SUMMARY

Full Stack Engineer with expertise in front-end development, currently working as a Programmer Analyst. Focused on delivering seamless user experiences, solving complex technical issues, and collaborating across teams to integrate innovative solutions. Eager to leverage full stack skills to drive product success and customer satisfaction in dynamic environments.

WORK EXPERIENCE

Programmer Analyst | Cognizant Technology Solutions Oct 2024 - Present

- Developed an application using the Vue.js framework, aligning with client requirements for a medical sector life sciences business unit.
- Managed front-end design and implementation, integrating with Salesforce to enhance functionality and streamline customer data management.
- Collaborated with back-end developers to retrieve and deploy code, working with cross-functional teams to optimize system performance and improve user experience.
- Recognized for contributions to project efficiency and commitment to delivering high-quality client solutions.

Programmer Analyst Trainee | Cognizant Technology Solutions Sep 2023 - Sep 2024

- Developed and maintained a web application using HTML, CSS, and JavaScript, tailored to the client's needs.
- Gained practical experience in front-end development, optimizing web performance and ensuring mobile responsiveness.
- Participated in all stages of the software development lifecycle, including designing, coding, testing, and troubleshooting front-end components.

INTERNSHIP

GenC | Cognizant Technology Solutions Jan 2023 - Jun 2023

- Selected for the GenC program. Developed an end-to-end project using Angular 15, HTML5, CSS3, Bootstrap 5, JavaScript, TypeScript, Node.js, Express.js, and MongoDB.
- Acquired project management skills through Udemy courses and received guidance from an assigned virtual mentor for doubt resolution within the organization.
- Passed three stages of evaluation in the GenC program: Qualifier, Interim-Check, and final SME evaluation, showcasing technical proficiency and project management skills.
- Gained leadership experience through strong performance and completed training in the software development lifecycle and Agile methodologies.

TECHNICAL SKILLS

Vue.js • Angular • HTML 5 • CSS 3 • JavaScript • ES6 • TypeScript • Bootstrap 5
Node.js • Express.js • MongoDB • Salesforce • Git • Agile • Jira

PROJECTS

- PayEase-App (MEAN Stack) integrated with PayPal developer sandbox for Payment Gateways
- Portfolio Web App
- UI-A2B Restaurant Event Registration App
- Heads or Tails Using Local Storage
- Basic Calculator
- Weather App to Detect Weather Changes

- Health Insurance Premium Prediction Using Machine Learning
 - Rock Paper Scissors: User vs Computer Move
 - Implementation of Handheld Cursor Control Using Machine Learning
-
